

Chestnut Oak

Quercus prinus

- Category:** Deciduous
- Growth Rate:** Slow to average
- Adaptability:** Full sun
- Shape:** Rounded
- Size:** 50-70' tall, 50-70' wide
- Fall Color:** Yellow-brown
- Wildlife Value:** Acorns are an important food source for wildlife.
- Description:** Easily grown in full sun. Generally considered to be a low-maintenance, long-lived tree with good drought tolerance. A large shade tree for yards. Good selection for areas with poor, rocky soils.
