

Nuttall Oak

Quercus nuttallii

- Category:** Deciduous
- Growth Rate:** Average
- Adaptability:** Full sun
- Shape:** Rounded
- Size:** 40-60' tall, 25-35' wide
- Fall Color:** Red
- Wildlife Value:** Almost always a reliable producer of acorns, and therefore very important for wildlife.
- Description:** It is able to grow in marginal environments and combined with its unrivaled bright red autumn color has made this oak a highly recommended tree for poorly drained and disturbed urban sites.
