

American Yellowwood

Cladrastis kentukea

- Category:** Deciduous
- Growth Rate:** Slow
- Adaptability:** Full sun to part shade, can handle drought after established.
- Shape:** Rounded
- Size:** 30-50' tall, 30-50' wide
- Fall Color:** Yellow
- Wildlife Value:** Provides nectar for pollinators, places to raise young and food for wildlife in winter.
- Description:** An underused small to medium-size native tree with year-round interest created by its spring flowers, great summer texture, showy fall foliage and its gray bark and pleasant form apparent in winter. Fragrant white flowers appear in drooping clusters in late spring. A heavy bloom occurs every few years.
