

Natchez Crape Myrtle

Lagerstroemia x 'Natchez'

Category: Deciduous

Growth Rate: Fast

Adaptability: Full to partial sun

Shape: Rounded and spreading

Size: 20-30' tall, 20' wide

Flower/Fall Color: White flowers, orange-red fall color

Description: A large shrub or small tree with smooth, dark cinnamon-brown exfoliating bark. The crinkly texture of the flower petals suggests crepe paper; indeed, the latter spelling is almost as widely used as crape. Panicles of pure white, soft textured flowers bloom all summer. Makes an excellent specimen, accent or group planting.
