

Loblolly Pine

Pinus taeda

Category: Evergreen

Growth Rate: Fast

Adaptability: Full sun

Shape: Oval, rounded crown

Size: 50-75' tall, 25-35' wide

Fall Color: No change in fall color

Wildlife Value: Provides nesting sites and cover for birds

Description: This tree is particularly noted for its straight trunk. It loses its lower branches as it matures, gradually developing a dense oval-rounded crown. Pines create a light shade which allow grass and other plants to easily grow beneath the canopy.
