

## Possumhaw Viburnum

*Viburnum nudum*

**Adaptability:** Prefers sun to part shade in acidic, moist, well-drained soils

**Shape:** Rounded, multi-stemmed, upright spreading

**Growth Rate:** Medium

**Size:** 5-12' tall, 5-12' wide

**Flower/Fall:** Aromatic white flowers in May-June, followed by clusters of ovoid berries that change from light pink to purplish black. Dark red-purple fall foliage.

**Wildlife Value:** Attracts pollinators and birds. Larval host plant for butterflies.

**Description:** Also known as smooth witheredod. For best fruit production, plant in groups. This is a low maintenance tree that does not generally require any pruning.
