

Shoal Creek Chaste Tree

Vitex agnus-castus

Category: Deciduous

Growth Rate: Rapid

Adaptability: Full sun for best flower production

Shape: Erect, spreading vase shaped

Size: 10-15' tall, 5-12' wide

Flower Color: Showy fragrant purple/lavender

Wildlife benefit: Attracts pollinators, such as butterflies, bees and hummingbirds

Description: Fine, lacy leaves are glossy and green. Bright purple flowers begin to form in spring and continue through the heat of the summer and into fall. Interesting foliage and late summer flowers are attractive in shrub borders. Resistant to deer, diseases and tolerates drought.
